Strengthening Partnerships for a Brighter Future: TFCF and ViN Join Forces for Water Tank Construction in Okhaldhunga

Okhaldhunga, Nepal – On February 18th, 2025, a momentous collaboration between Taiwan Funds for Children and Family (TFCF) and Volunteers Initiative Nepal (ViN) took a major step forward. Representatives from TFCF visited the water tank construction site in Okhaldhunga to discuss the progression of the ongoing project, aimed at improving access to clean water for the local communities.

The partnership between TFCF and ViN is not just about building infrastructure; it is about creating long-term impact. In addition to the water tank project, the collaboration will extend to supporting education initiatives for underprivileged children and families in the region. The goal is to enhance the overall quality of life for those who need it most, combining essential resources like clean water with educational opportunities that can change lives.

Empowering Marginalised Communities

During the visit, ViN's President and TFCF representatives had meaningful discussions about the future of their partnership. Both sides expressed their commitment to working together to tackle the pressing challenges faced by marginalized communities, particularly in remote areas such as Okhaldhunga.

This partnership holds special significance as it addresses two critical issues at once: access to clean water and education. With the water tank construction project set to be completed soon, the community will benefit from reliable access to water, reducing health risks and improving daily life for families, especially children.

At the same time, educational support will empower young learners with the knowledge and skills they need to break the cycle of poverty and create better opportunities for their future.

By combining efforts, TFCF and ViN are creating a lasting impact, working hand in hand to build a more sustainable and brighter future for the people of Okhaldhunga.

Stay tuned as this powerful collaboration unfolds, and as ViN and TFCF continue to work towards a better tomorrow.
